

[Thanks, but this is boring take me to the Contract, I'll sign it.](#)

What I do for You

I will develop a program for your company guaranteed to meet the new DOSH ACRU requirements and assist you with the application. There are no additional time charges unless there are current or past OSHA or Cal EPA AQMD APCD Citations pending or enforced against your company. Or delays greater than ninety days on your part. In that event the additional time needed may be billed only on a pre-approved cost basis. You will need to show that you have the management experience, trained employees, medical insurance, your own licenses, and your equipment list. I will complete the items on the DOSH checklist. I will make the electronic copies that DOSH now requires to be provided with your paper application. DOSH requires that you provide them with a sample contract and the job estimate sheet that you will use for asbestos work, letterhead, proof of US Citizenship, insurance and other business requirements. I will provide the DOSH ACRU Application document binder, tabs and the contamination prevention, Asbestos SOP, air monitoring, medical monitoring and respirator programs (everything in Part V). I will help you communicate with the DOSH ACRU unit until your application is complete and approved. The flat rate for that service is \$3000.00 payable in advance. You will need to attach the IIPP table of Contents, and copies of the employee discipline program for violating safety & health rules, and the section that outlines job inspections by management and the steps taken when discrepancies are noted. Written records of those management inspections must be maintained. I will return your application package to you with part 5 completed. In the event that you do not have a current illness and Injury Prevention Program we can help you provide that part of the IIPP program required by DOSH ACRU. You will then add the forms and other paperwork and return the package to me. I will give it a last look and send it to DOSH ACRU in the format that they want. I will stay with you and help answer any questions during the rest of the application process.

You will need to complete the DOSH Application Forms, Write a description of your experience and be able to tell DOSH why you are ready to do work as an asbestos removal contractor, furnish worker certifications, insurance certificates, proof of US citizenship and other business documents. You will need to be able to qualify for the California State Contractors License Board (CSLB) C22 License. You will need to sign a statement that says you will use and enforce the SOP. You must complete the above within ninety days, to avoid possible additional charges for delays. DOSH Packages not returned within ninety days have a minimum \$350.00 charge if the booklet must be recreated because State Requirements or your Company Information has changed. Packages not returned within ninety days may be considered to have been abandoned. Packages not returned after one year are abandoned.

For the next year after the date of your DOSH approval you are authorized to use the [acru.dnaci.h.com](http://acru.dnaci.h.com) roster organization web site. The forms that you need to use are available on the site for downloading. The Air Monitoring Form will do the math for you so all you need to do is fill in the Lab's Chain of Custody form. If you remain a client you will be able to use the site on an annual contract. The site registers your worker roster and helps you keep track of the worker training certificates. You will have your own password and user name. After the first year the annual charge for the roster service is \$400.00.

[OK I have read everything, I'll Sign the Contract, give it to me.](#)
